Gentleman I oppose HR 4026...it seems that since I play for the service and it is satellite radio the FCC should not have anything to say ...It `s clllean radio and the people that want to silence the weather and road condition reports should just stay out of the picture..

For trucking which I do this feature is well worth the money for me.
Pls stay out of the picture and allow this feature to continue,,,I don`t need to hear static on my radio just because the nation broadcaster want me not to have this...

Thanxs

Mike Toth
